PROJECTS

FoodPrep — Full-Stack Food Ordering Platform

React, Node.js, Express, MongoDB, JWT

Developed a full-stack food ordering application with user registration/login, JWT-based authentication, protected routes, role-based access, menu browsing, and RESTful APIs. Designed reusable React components and integrated the frontend with a MongoDB-backed Express API.

Argus — Fraud Awareness & Reporting Platform

React, Node.js, MongoDB, REST API

Built a web platform concept for helping users identify and report online fraud. Implemented structured report submission, scam-information workflows, and API-driven data handling with a focus on clear UX.

Crack Detection Submarine Prototype

Python, Computer Vision, Image Processing

Worked on an autonomous underwater inspection concept for detecting cracks in submerged structures. Applied image-processing techniques to assist automated visual inspection and defect identification.
